

Alkali Dosing Pumps

Advanced Alkali Dosing Pumps made in China. Alkali dosing Pump is one kind of Mechanical Diaphragm Metering Pumps Are suitable for water treatment equipment and engineering, For Chemical Fluid.

Advanced Alkali Dosing Pumps made in China

1.Product Introduction of Alkali Dosing Pumps

Alkali dosing Pump adopts precision cast aluminum alloy body, which can transmit high viscosity medium, corrosive liquid and dangerous chemicals.

2.Product Parameter (Specification) of Alkali Dosing Pumps

| | |
|-----------------------|---|
| material of pump head | PVC、SS316 |
| Pressure | 3-12Bar |
| Flow | 12-2000L/H |
| Diaphragm | PTFE diaphragm |
| Power | 380V 3 phase on standard, single phase or other voltage on request; EX-proof motor is available on request. |

3.Product Feature And Application of Alkali Dosing Pumps

Characteristic: high performance; Adjustable; No leakage;

Nice Appearance: Fashionable shape, special design arc, highlight the noble temperament.

Motor driven with mechanically linked diaphragm

Steady state accuracy up to $\pm 2\%$

Accuracy at repeatability $\pm 3\%$

Well suitable for continuous duty

Accurate micrometric stroke control arrangement

Splash type lubrication in gear box

Automatic capacity adjustment with reference to process parameters (optional)

Applications: Alkali dosing Pump is widely used in petrochemical, power, environmental protection, metallurgy, mining, shipbuilding and other industries.

4. Deliver, Shipping And Serving of Alkali Dosing Pumps

5.FAQ

How many years have your company made this kind of equipment?
For about 10 years.

Which certificate do you have for your equipment?
ISO9001

What is your term of payment?
30%deposit ,70% before delivery.
