

Sulfuric Acid Dosing Systems

To provide the best in quality products to our clients, we are betrothed in manufacturing, exporting and supplying an excellent quality Sulfuric Acid Dosing Systems. With the use of premium grade raw materials and modern techniques, the offered system is manufactured at our premises as per set industry norms. This system is best to be used in water treatment plant for sulfuric acid dosing purpose. Furthermore, our valuable patrons can easily buy the provided Sulfuric Acid Dosing Systems at marginal prices from us.

1. Product Introduction of Sulfuric Acid Dosing Systems

As per the variegated requirements of our clients, we are offering a broad collection of Sulfuric Acid Dosing Systems. These dosing systems are comes in several specifications as per the need of our customers. The offered dosing systems are tested from our end in order to deliver a defect free range to customer's end. Our dosing systems are developed with quality material under the direction of skilled professionals.

2.Product Parameter (Specification) of Sulfuric Acid Dosing Systems

| | |
|------------------------|------------------------------|
| Usage/Application | Chemical Dosing |
| Automatic Grade | Automatic |
| Automation Grade | Automatic |
| Material | SS 316 / SS 304 / P.P / HDPE |
| Installation Service | Yes |
| Brand | Minimax Dosing pumps |
| Application | For H2so4 dosing |
| Minimum Order Quantity | 01 Set |

Sulfuric Acid Dosing Systems Features:

Robust construction
Unmatched performance
Easy to operate
High functionality
Smooth finish
Durability

Sulfuric Acid Dosing Systems Other Details:

Precision engineered dosing pumps that find suitability for continuous duty applications
Systems made available with accurate micrometric stroke control arrangement in construction material choices like AISI 304, PTFE/GFT, AISI 316, PP, PVDF or as specified by customers
Finding extensive use in water and waste water treatment chemical industry
Coming with adjustable injection frequency as well as compact finish size
Its light weight finishes also makes it suitable to be used anywhere
Dosing systems offered in different working capacities so as to meet different chemical treatment application needs
Offered system comprises chemical tank, dosing pump as well as required hoses and fittings as needed in pumps
Suitable for use in different water as well as waste treatment applications in reverse osmosis systems
Developed using quality components and latest technology support
System developed for meeting requirement of accurate chemical dosage needed for water as well as waste water treatment

3.Deliver,Shipping And Serving of Sulfuric Acid Dosing Systems

4. FAQ

Q: How about delivery time?

A: 1. It is about 7 working days if products are in stocks.
2. If product are out of stock, it is 15-25 working days.

Q: Could you provide samples?

A: Yes, of course. We can send you one sample before we down the payment, but the price f the sample pump and the freight charge is paied by your side.

Q: How about product problem solution?

A: If you can't solve the problem in your local, please send the product to us, we will repair it, then back to you.
